## Overview

---

A hybrid solar system is a photovoltaic (PV) installation that combines solar panels with battery storage while maintaining a connection to the electrical grid. This energy can be used to generate electricity or be stored in batteries or thermal storage. electric power sector totaled about 4,260 billion kilowatthours (BkWh) in 2025. In our latest Short-Term Energy Outlook (STEO), we expect U. 6% in 2027, when it reaches an annual total of 4,423 BkWh.
