

Espay Solar Energy S.L.

Solar power with grid backup in london

Overview

Yes, many battery systems can provide backup power during outages in London if installed with the correct hardware (e., an automatic transfer switch or specific inverter). We install top brands known for reliability and performance like Tesla Powerwall helping you select the optimal capacity (kWh) and type (AC/DC coupled, LFP) for your London property. Full installation and setup are included by our certified engineers. ApolloGrid as Rahvolt Group's core UK operating subsidiary, delivers integrated energy storage solutions for British households-encompassing sales, professional installation, maintenance, and lifetime support for premium solar inverter-battery systems. Most solar panels on the market can't achieve. By installing solar panels on your roof, you can generate your own clean energy, store excess power in a battery storage system, and even charge your electric vehicle—all from the power of the sun.
