

Espay Solar Energy S.L.

Solar self-powered water pump

Overview

A solar powered water pump is a water-lifting system powered entirely by energy from the sun. It replaces electric or fuel-powered pumps by using photovoltaic (PV) solar panels to drive water from sources like ponds, wells, rivers, or boreholes —even in the most remote places. We put them to the test to see how they'd perform in real-world conditions. Discover more about the small businesses partnering with Amazon and Amazon's commitment to empowering them.
