Solar system installation in Kenya

Overview

This article provides a detailed guide to help you navigate the process of installing solar panels in Kenya, from the initial decision-making stage to final commissioning. A typical 5kW home system costs around KES 450,000–550,000 and pays back in 3–4 years. Here's. Electricity costs in Kenya continue to rise, and with frequent power outages, many homeowners in Nairobi and across the country are turning to solar energy as a reliable and affordable alternative. But finding a trusted solar installer — one who shows up, delivers quality work, and doesn't overcharge — can be a challenge. With abundant sunshine year-round and rising electricity costs, switching to solar isn't just a trend—it's a smart investment in your future.
