

Espay Solar Energy S.L.

Solar thermal energy laos

Overview

ASEAN member Laos has plans to increase renewable energy in its power mix, notably solar power buildout. However, it continues to rely on hydropower and coal-fired power plants to generate electricity, complicating both its way forward and decarbonisation plans. Laos has taken another step toward expanding its clean energy sector by signing a USD 1.45 billion agreement with China Western Power Industrial and a Singapore-based construction firm. The deal, announced in a stock exchange filing on 24 March, involves designing, supplying, and constructing an. Laos has approved a 5MW solar project in Sanamxay district, Attapeu province, according to a Memorandum of Understanding (MOU) signed between the government and the developer, Lao News Agency reports. This initiative is a key part of the province's ongoing efforts to expand its renewable energy. In Laos, recent milestones such as the 600MW Monsoon Wind Farm and the nearly complete 1GW Northern Clean Energy Project underscore the country's momentum in scaling renewable energy.
