

Espay Solar Energy S.L.

Technical parameters of a 200kWh foldable container for community use

Overview

Learn more about the detailed model, parameter configuration, compatibility, environment, and product description of the LUNA2000-97/129/161/200KWH. All four models can be used together. This table only applies to scenarios where up to 5 ESSs are connected in parallel. When different models are connected in parallel, each ESS is charged and discharged according to its respective actual C. and is characterized by its flexible and lightweight substructure. The semi-automatic electric drive brings the mobile photovoltaic system over a length of almost 130 meters quickly and without effort into operation with 20-200kWp foldable PV panels and 100-500kWh battery storage. It's a high-yield, portable solution for urgent deployment and high-demand field applications. HighJoule's 200KW Solarfold unit is built for fast deployment in emergencies. Our foldable solar containers combine advanced photovoltaic technology with modular container design, delivering rapid-deployment, off-grid renewable energy with industry-leading efficiency. Compared with the Foldable Photovoltaic Power Generation Cabin, the folding power storage warehouse is equipped with energy storage battery, which is more suitable for long-term emergency. The following configurations make up a complete 200kva 200kW solar power plant: Optional solar mounting support, PV combiner boxes, and cables. PVMARS provides a complete turnkey PV energy storage system solution.
