# **Tesla batteries as photovoltaic energy storage**

## Overview

---

Powerwall is a compact home battery that stores energy generated by solar or from the grid. You can then use your stored energy to power the devices and appliances in your home day and night, during outages or when you want to go off-grid. Like Tesla, EV manufacturer BYD. As solar energy adoption grows, homeowners seek efficient ways to store excess power for later use. As the CEO of InOrbis Intercity and an electrical engineer with an MBA, I've spent years. We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U.
