## Overview

---

Hot on the heels of Tesla's eagerly awaited solar roof, Tehran-based BMDesign Studios designed Alavi House - a home for Isfahan, Iran that will be finished with Tesla's new and seemingly invisible solar cells. Optimized for solar, the Alavi House will produce more energy than it needs and it. Install Solar Roof and power your home with a fully integrated solar and energy storage system. Schedule a virtual consultation with a Tesla Advisor to learn more. This makes it aesthetically similar to a conventional roof - in stark contrast to the appearance of conventional solar panels mounted on the roof surface.
