UPS battery cabinet placement standards

Overview

The positioning of the battery room must be in close proximity to the UPS modules being supported. For voltage drop considerations, the UPS modules and battery systems should be in adjacent spaces— either side-by-side or vertically stacked. This paper will highlight those environmental design features that must be taken into consideration when designing, constructing, and fitting out a UPS battery room that will result in more than just a physical room to house the strings of batteries. Properly designed and constructed battery rooms. On behalf of everyone at Eaton, we thank you for partnering with us, for trusting us to maintain your business continuity and for preventing downtime at your facility. Our suite of backup power, power distribution and power management products are designed to protect you from a host of threats. ZincFive batteries. VRLA batteries usually have lower up-front costs but have a shorter lifetime than VLA. PowerShield is certified to ISO 9001 Quality standard, ISO 14001 Environmental management standard and OHSAS 18001 Occupational Health and Safety management system certification. Allow clearance in front of and above each cabinet for proper air circulation.

UPS battery cabinet placement standards
