## Overview

---

They cost less and require far simpler installation than rooftop systems, and have enough capacity to operate crucial household appliances like fridges and sump pumps, keep the lights on, and recharge communication devices — the basic necessities in an emergency. By installing storage on your home, you can increase your resiliency to power outages and reduce the cost of your electric bill. Many different types of storage technologies. The project is supported by the NY-Sun Initiative and is led by Sustainable CUNY in collaboration with Consolidated Edison, the National Renewable Energy Laboratory (NREL) and New York State Energy Research and Development Authority. For NYC buildings with large-scale PV potential (>200kW) CUNY. We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U. This amount represents an almost 30% increase from 2024 when 48. Ground-mounted solar lets you install solar on-site without attaching the panels to your roof. Homeowners must navigate a quagmire of complicated policies to determine whether the energy. That's why residential solar power combined with battery storage (once an esoteric niche industry) is rapidly becoming a mainstream disaster-preparedness choice, according to more than a dozen installers, manufacturers, and industry experts we interviewed.

### NY Solar Map

It looks like this roof may not be ideal for solar, possibly due to shade or rooftop equipment. Use the draw tool (located upper left on map) to see how much energy a solar installation on this roof would generate.

### Are lithium-ion battery arrays on

## electrical grids safe?

Lithium-ion batteries are increasingly being used to store power for electrical grids, but some localities are concerned about fire risks.

## Demand and Opportunity Today for Residential Energy Storage

The residential storage market is now experiencing significant expansion, driven by a confluence of factors making battery storage increasingly appealing to homeowners incorporating PV systems.

## Solar, battery storage to lead new U.S. generating capacity additions

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 when power ...

## NY residents rebel against battery storage plants for wind, solar power

Gov. Kathy Hochul's plans for the Empire State to go green are going south as local communities refuse to build massive battery plants that would store wind and solar energy.
