# **What are the free schemes for photovoltaic panels**

## Overview

---

The federal government does not provide free solar panels, but many states and utilities offer incentives that can reduce the cost of going solar. You can install solar panels on your roof with no upfront cost by signing a lease or PPA or taking out a \$0-down loan. However, the federal government does not offer any programs for free home solar panel installations nor does the government require companies to grant. When something is advertised as “free,” it usually comes with a few strings attached—free solar panels are no exception. Companies that offer “free” solar panels are typically offering solar lease agreements, so you can reap the benefits of solar-powered electricity without dealing with the upkeep. Advertising “free solar panels from the government” is one of the most common scams in the solar industry.
