# **What is a solar system**

## What is a solar system

---

### The solar system--facts and information , National Geographic

Our solar system is made up of the sun and all the amazing objects that travel around it.

---

### Solar System - Definition & Detailed Explanation

What is the Solar System? The Solar System is a collection of celestial bodies that are bound together by gravity. At the center of the Solar System is the Sun, a massive star that provides ...

---

### In Depth , Enceladus - NASA Solar System Exploration

Overview Few worlds in our solar system are as compelling as Saturn's icy ocean moon Enceladus. A handful of worlds are thought to have liquid water oceans beneath their frozen shell, ...

---

### Ceres 3D Model - NASA Solar System Exploration

your experience.

## Science 101: The Solar System

Our solar system's particular configuration of planets and other celestial objects all revolving around a life-giving star make it a special place to ...

## RPS 3D Viewer

NASA Solar System Exploration Our  
Galactic Neighborhood Solar System  
Planets Moons Asteroids, Comets &  
Meteors

## Solar System - Definition, Facts, Planets

The Solar System is the gravitationally bound system of the Sun and all celestial bodies that orbit it. This includes planets, moons, asteroids, comets, ...

## Solar System

What is a solar system? A solar system is essentially a star orbited by one or more planets bound to it by its gravitational pull. Our solar system is ...

## Solar System: Planets, Moons, and the Sun Explained

With each planet, moon, asteroid, and comet, the solar system tells a story of birth, destruction, rebirth, and motion--stories written in craters, frozen ...

## Pluto By the Numbers

Pluto was once our solar system's ninth planet, but has been reclassified as a dwarf planet. It's located in the Kuiper Belt.

## The Solar System

The solar system includes the Sun, planets, dwarf planets, moons, rings, asteroids, comets, and particles of dust.

## In Depth , Our Solar System - NASA Solar System Exploration

Our solar system consists of our star, the Sun, and everything bound to it by gravity - the planets Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune; dwarf planets such as Pluto; ...

## Mars By the Numbers

The numbers displayed here are approximations. For more precise data, please visit [JPL Solar System Dynamics](#)

---

## Solar system , Definition, Planets, Diagram, Videos, & Facts , Britannica

Learn about the Sun, planets, dwarf planets, moons, asteroids, comets, and more in our solar system. Find out how our solar system orbits the Milky Way galaxy, how it supports life, and ...

---

## Planet Compare - NASA Solar System Exploration

NASA's real-time science encyclopedia of deep space exploration. Our scientists and far-ranging robots explore the wild frontiers of our solar system.

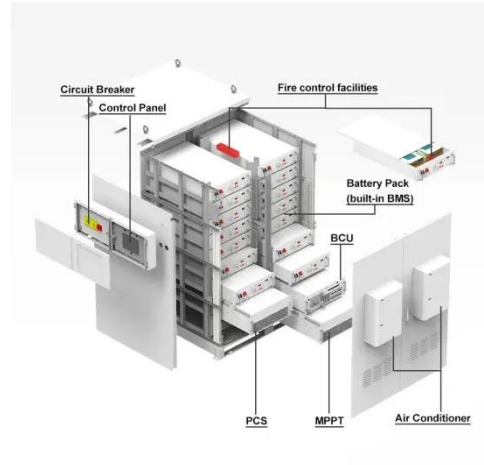

---

## In Depth , Sun - NASA Solar System Exploration

Its gravity holds the solar system together, keeping everything from the biggest planets to the smallest bits of

debris in orbit around it. Even though the Sun is the center of our solar system and essential to ...
