Overview

Check your switchboard to ensure the main switch hasn't been turned off. Next, identify that the power meter is the correct one. Otherwise contact your power company because you may have a blown pole fuse. Are you scratching your head wondering why your meter is on but there's. When a light goes out in your home, it's easy to follow a simple troubleshooting routine: check the light switch, inspect the bulb, and take a look at your circuit breaker. In the end, if you ever feel uncertain or unsafe, it's best to consult a licensed. If your circuit breaker is on, but no power is getting to your outlet, light, or appliance, there is a simple process to go through in order to find the culprit. As a 29-year seasoned electrician, I'll walk you through exactly how I always approach the issue. If surrounding houses are also dark, the outage is external and related to the utility grid.
