# **Will solar power be connected to the grid immediately**

## Overview

---

Professional Installation is Critical: Grid-tied solar systems require licensed electricians and multiple permits, with the interconnection process typically taking 2-8 weeks and costing \$200-\$2,000 in fees alone. Always refer to the NEC code in effect or consult a licensed electrician for safety and accuracy. There are two basic approaches to connecting a grid-tied solar panel system, as shown in. It was a fairly typical fault that happens from time to time on the grid. But this. But once the panels are up, there's one more step before your system can go live: connecting it to the grid. Each solar panel contains multiple photovoltaic (PV) cells that capture sunlight and convert it into DC (direct current) electricity. Owners of grid-connected homes can choose to supply a portion of their energy with solar energy, using the utility for power.
