Wind power storage in Busan South Korea

Overview

The Singapore-based subsea engineering company, G8, received approval to build a 1.5GW offshore wind farm in late December 2021. The project is planned to be built off the south-west tip of South Korea with the build site having recorded wind speeds of 7–8 m/s. Current plans are to begin construction, as well as marine works in 2023 or 2024. The project also involves the use of an advanced, long-life lithium ion energy storage system from 3DOM, a technology partner of G8.
