

Espay Solar Energy S.L.

Young man s homemade solar power generation

Overview

Watch as a young innovator transforms an iron pot and mirrors into a powerful solar generator! Witness the amazing journey as he enhances his design by salvaging a phototransistor from an old TV for improved efficiency. A young man used an iron pot and a mirror to make a solar power generation device. Once you learn this secret, you will never throw away plastic bottles again! . Portable, weatherproof, and ready-to-rock — a homemade solar generator can meet all your power needs in and around your boat, camper, or cabin. Then all the relevant input and output sockets are wired and mounted on the outside of the case where they are easily accessible. Building your own solar generator not only saves money but also helps reduce dependence on fossil fuels. These DIY projects turn sunlight into usable energy for camping trips, emergencies, or even daily household use. Here are ten brilliant ideas to spark your next sun-powered creation. In the final test, see the generator in action as it powers a fan, water pump. The Green Energy Harvester, loves to make things related to Arduino, Solar Energy, and Crafts from used stuff.
